Counterpoints; Vol. 299

The American educational system is in flux. Many would argue that it has been assaulted and oversimplified by the right. There is growing concern that the US is becoming a "liberal" nation-state with an increasingly anti-liberal population and an electorate that is disinterested in politics. In this globalized world, the power of capital is so great that opposition to it is often discouraged and disheartened, leaving many citizens of the U.S. have few political precepts by which to consider their institutions. This contemporary failure of vision has opened the way for the unimpeded return of the philosophy of the free market. As a result, social and educational policies are debated almost solely in terms of how they fit with the needs of the market. Social and ethical understandings are replaced by a failed economic theory that requires a radical constraint of our political and economic choices. Compassion for the poor, the market lets us know, is wrong-headed because any interference with the labor market will always result in unfortunate economic and social consequences. Moral issues are eclipsed by market needs. In *Critical Pedagogy: Where Are We Now?* the editors and the authors discuss how the field of critical pedagogy should respond to such dire conditions in a way that is theoretically savvy and visionary, while concurrently contributing to the struggle to improve the lives of those most hurt by them.

Critical Pedagogy Primer provides a short, smart, and innovative introduction to this topic. This refers both to the constantly changing and evolving nature of critical pedagogy, and to the need to keep the field on the cutting edge of scholarly innovation. These concerns are presented in a language that is designed for both uninitiated and sophisticated readers.
