

UCLA

BruinBill

Name: Josephine Bruin
Quarter: Spring 2022

Major: Philosophy
Year: Junior

Each BruinWatch ID Card will have an GIS sensor embedded in it.

Interactive maps will be placed around campus and in all libraries. These touch screen devices will display personal menus and friends on campus. A new, improved social network.

All of the information collected by BruinWatch will be stored in databases— connecting all of the information back to the unique student ID number. Each member of the ULCA community will have access to the information depending on their status. Tier 1 is for students, the lowest level— this level is read only.

The servers will be on campus. They will require upkeep by skilled hardware professionals. As more information is accumulated, additional servers will be installed.

ITEM	COST
4 Infrastructural components	Incurred by each student per quarter
