"Glamorizing Together, Because It's Worth It"

*Soumya Jain
Virginia Pham*

Problem

I only have several pieces of nice jewelry because nice jewelry is expensive.

Solution

Sharing jewelry amongst many users:

More jewelry for the users to choose from!

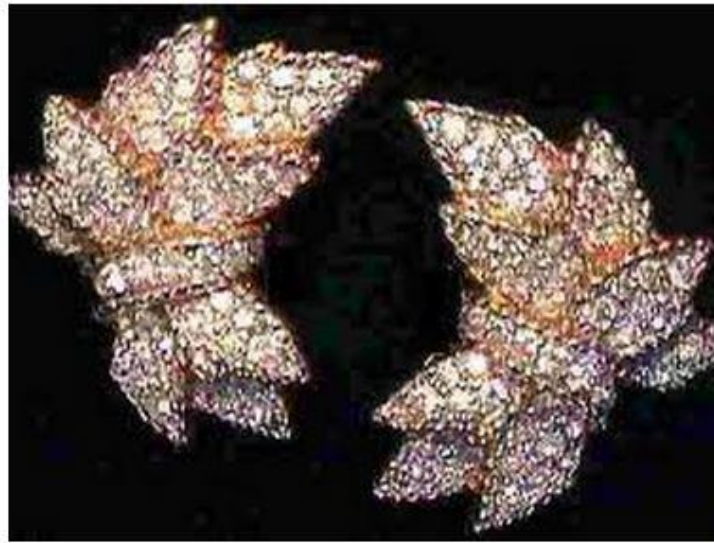

Overview of JewelryShare

- Sharing of accessories with friends, families, and strangers
- Centralized web-service
- Loan your jewelry, return, and repeat

"The world of glamour awaits you, just a click away."

How the service works

- Signing up for the service: \$10/month
or \$100/year
- Each item costs 15% of retail value to rent
- The more valuable items you put up for loan
= you pay 10% of retail value to rent
- Free shipping both ways

*Glamorizing
together ...*

because it's worth it

CHIC JEWELRY

Our Story

Sharing accessories is gaining immense popularity. Some of us like having lots of cheap jewelry, which can wear down quickly after just several uses, or some of us like having few pieces of higher-end jewelry, which is very expensive. By providing a centralized service that would help facilitate sharing, Jewelry Share aims to make sharing easier for everyone.

How to share your jewelry

Upon jewelry's arrival:

- Inspected
- Valued
- Authenticity verified
- Sanitized

After all that, listing will be created

Challenges

Customer validation

- customers need to be real

Trust

- how will people trust us with their valuables?

Sanitation

- items need to be cleaned

Accountability for stolen/damaged items

- what happens when items are damaged/stolen/lost?

Authenticity

- how do we know the items are not knock-offs?

Verifying the object actually exists

- how do we know the items exist?

Countering the challenges

Customer validation

- background check on customers

Trust

- gained through time and with more users

Sanitation

- items will be cleaned at HQ

Countering the challenges

Accountability for stolen/damaged items

- renter responsible if lost/damaged
- items are insured when mailed

Authenticity

- at HQ, authenticity and value are checked

Verifying the object actually exists

- items must be mailed in before they are listed
