

CUTTING EDGE

- *a modern approach to the kitchen* •

DESIGN

With the kitchen classicist in mind, the Cutting Edge was made to keep the traditional kitchen aesthetic but allow the users to participate in an increasingly interactive lifestyle. The form of the cutting board is familiar and comforting to the user. Our detachable covers allow for a variety of surfaces and sizes. This was you can also wash them without submerging the electronics in water.

The function, however, revolutionizes how the user interacts with their food. Instead of spending too much time searching the internet to understand the nutritional value of your food based on portion sizes--Cutting Edge takes all the guess work and calculations out of your hands and out of your mind. By using the voice recognition feature in our app, you can indicate which ingredient in a recipe you are using and it calculates the nutritional value for you!

Want to follow your own recipe? Cutting Edge allows you to enter your own ingredients and calculates based on the ingredients you have chosen.
