★☆☆☆☆ One Star

By AmazonNut on March 17, 2017

Verified Purchase

This PC is good for the price but it got recalled for a dangerous battery

★☆☆☆☆ Bad battery life.

By Tanya on February 12, 2017

Verified Purchase

It works if you leave it plugged in. battery would last about 3 hours. Keyboard is really sensitive. You get what you pay for. We returned it because of the bad battery life.

★★★★☆ Great Bang for your buck. Touchscreen :)

By Michael D. Anema on January 4, 2017

Verified Purchase

I've been looking for over a year for a laptop under 300.00 that has everything I wanted. I had a burgundy hp picked out and on the day I was going to buy I saw this one and it was 40.00 cheaper. It had touchscreen a bigger drive and faster processor, windows 10 ect. The other laptop didn't have any of these. Touchscreen sold me right there . This was easy to setup if you read the instructions (guys) shows you how to sync all of your devices so you can share videos, pics ect. You can take a pic with your phone and it will automatically go to your laptop n save. Just love the ease and convenience. I highly recommend this laptop. I don't remember ever seeing a pc under 300.00 that's touchscreen.

There's only one complaint I have... the battery life when not plugged in could be alot longer. I think that a battery should be able to last an entire flight. Sorry I'd give it a 5 star, but battery life is pretty important issue.
